

PEREGRINE FALCON

A Peregrine Falcon - a rare find!

Once endangered, this bird is also known as the "DUCK HAWK" because ducks and many similar size and smaller birds are the prey of the Peregrine Falcon.

**The Peregrine Falcon dives at speeds exceeding 200 mph.
It seizes its prey in mid air,
thus making it
"THE FASTEST BIRD ALIVE".**

In the last 4 years of photographing the birds of the Everglades and 10,000 Islands, this is the first time I have seen this species.
